1 Introduction

EZAccess is an attendance management software application program based on access control and used with access control devices. EZAccess supports device management, personnel management, access control and attendance management. EZAccess supports flexible deployment and meets various demands from small and mid-sized access control and attendance management projects.

2 System Requirements

The computer (PC) that runs the software shall meet the following minimum configuration. The actual system requirements may vary depending on the way EZAccess is used.

Specifications	Requirements
CPU	Intel® Core™i5-3470 CPU @3.2GHz (4 CPUs)~3.2GHz or higher
Memory	8GB or more
HDD	At least 20GB free space
Monitor	1440*900 resolution or higher
Operating system	Microsoft Windows 7/10, 64-bit

CAUTION!

- Please disable the antivirus software on your computer before you start installation.
 - If you are using V1.2.0.1 or later, you can upgrade the version by directly installing a higher version without uninstalling the current version.
 - If you are using V1.3.0 or later, you can downgrade the version by directly installing a lower version without uninstalling the current version. The lowest version you can downgrade to in this way is V1.3.0. To downgrade to versions lower than V1.3.0, you have to uninstall the current version first.
 - When the client software starts, it automatically disables the sleep mode on the computer. Do not enable sleep mode.
 - If the antivirus software alerts you to risks when scanning the client software, please ignore the alert or add the client software on the trusted list.
-

3 Login

Enter the username and password, click **Login**.

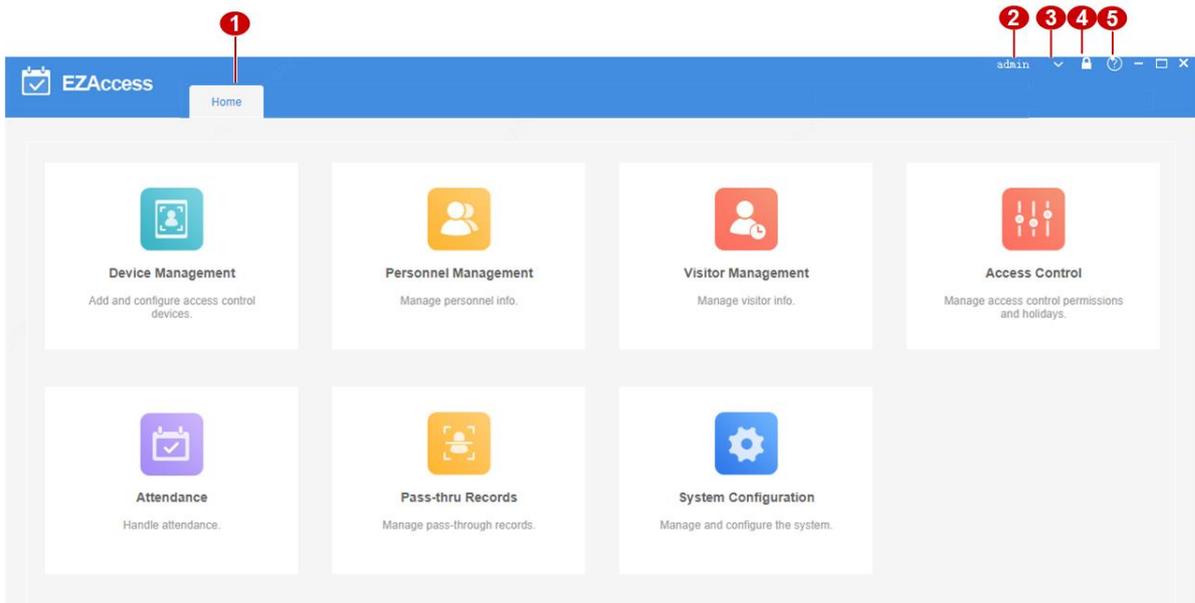

NOTE!

- For first-time login, a page is displayed for you to create new users. Enter the username and password for the new user. Please set a strong password to enhance account security.
- If **Auto Login** is selected, EZAccess will skip the login page at the next startup and automatically log in using the most recently used username.

4 GUI Introduction

The main page is displayed when you are logged in. The main page consists of the Control Panel and some functional buttons.

No.	Description
1	Home page, including Device Management, Personnel Management, Visitor Management, Access Control and Attendance Management, Pass-thru Records and System Configuration modules.
2	Shows the current username. Click to view the user type and login time.
3	Click to change password or log out.
4	Lock button. Click to lock the client software. A password is required to unlock the client software.
5	Help button. Click to view software information, open source software licenses or the user manual.

5 Device Management

Use EZAccess to manage access control devices. Add access control devices for access control and attendance management.

5.1 Add a Device

1. Click **Device Management** on Control Panel.

NOTE!

Click **Add** to add a device with a known IP address. This section describes how to search devices on the same subnet with the PC and add the discovered devices.

2. Click **Auto Search**. Devices on the same subnet with the PC are discovered.

Auto Search							
+ Batch Add		IP Address: 192.168.2.0 - 192.168.2.255		Status: All	Auto Search		
<input type="checkbox"/>	Status	IP Address	Port	Model	Serial No.	Operation	
<input type="checkbox"/>	No	192.168.2.214	80	ET-B31H-M		+	

3. To add a device, click for the device in the **Operation** column. To add multiple devices with the same configurations (username/password), select the devices and then click **Batch Add**.
4. Narrow down the search by setting search conditions:
 - IP address: Search devices within the specified range.
 - Status: Filter devices that have been added or not.
5. Check whether the device is online.

NOTE!

- Up to 32 devices are allowed.
- Before you add a device, configure a fixed IP and set a default face library on the device. See the device user manual for detailed information.

6 Personnel management

Add persons for attendance management.

6.1.1 Organization

1. Click **Personnel Management** on Control Panel.
2. Click to edit the organization name on the left-side organization list.

- To create an organization, click **+** right to the root organization, enter the organization name. The organization appears on the organization list. You can add more organizations in the same way. To delete an organization, click **🗑**. Up to 10 levels of organizations are allowed.

NOTE!

- The root organization cannot be deleted or modified.
- An organization that includes organizations cannot be deleted.

Click an organization to view people in the organization and its sub-organizations.

6.1.2 Add a Person

NOTE!

- Totally up to 5000 persons are allowed. Up to 500 persons are allowed in an organization (not including sub-organization).
- If a person ID already exists on the client, then a person with the same person ID cannot be added before the existing person ID is deleted from the client.
- Up to six face images can be uploaded for each person. Only JPG images are allowed. Image size: 10-512KB. Max resolution (W*H): 1920px*1080px.

1. Add in batches

- Click **Personnel Management** on Control Panel.
- To download the default template, click **Download**.
- Enter the required personal information in the template. The person ID, name are required.
- Select the target organization from the left-side organization list, click **Batch Import**.
- Select the file to import and then click **OK**.
- The list updates automatically when data is imported successfully.

NOTE!

Up to 500 persons can be imported at a time.

2. Add one by one

- Click **Personnel Management** on Control Panel.
- Select the target organization from the left-side organization list, click **Add**.

The screenshot shows a web interface for personnel management. On the left, there is a tree view of departments with 'dept 1', 'dept 2', and 'dept 3'. The main area contains a search bar with 'Name:' and 'ID No.:' fields and a 'Search' button. Below the search bar is a row of action buttons: '+ Add', '🗑 Delete', '👤 Assign Personnel', '⬇ Batch Import', '⬆ Export', '📄 Download Template', and '🖼 Batch Import pictures'. A 'Get Personnel' button is also present. At the bottom, a table is visible with the following columns: Person ID, Name, Gender, Department, ID No., IC Card No., Phone, and Operation.

- Complete the required personal information. The person ID, name are required.

4. Click **OK**.

Click the organization on the left-side organization list. The persons in the organization are listed on the right side.

3. Import pictures in batches

1. Click **Batch Import Pictures**.
2. Upload a ZIP file that includes images named in this format: Person ID_OrderNum.
3. Click **OK**. The pictures are imported.

4. Get personnel

1. Click **Get Personnel**, and then select the target device.
2. Click **OK**. The personal information of the device is shown in the table below. The personnel successfully got will be deleted from the device side and assigned to the temporary department. Please assign personnel according to the actual situation.

6.1.3 Delete a Person

1. Delete in batches

1. On the left-side organization list, click the organization that the person belongs to, click **Add**.
2. Select the person you want to delete.
3. Click **Delete**.
4. In the dialog box displayed, click **OK**.

2. Delete one by one

1. On the left-side organization list, click the organization that the person belongs to, click **Add**.
2. Click  below the person you want to delete.
3. In the dialog box displayed, click **OK**.

6.1.4 Other Operations

1. Search personal information

Enter the name or ID number on the top and then click **Search**. Search results are displayed.

2. Export personal information

Select the target organization on the left-side organization list, click **Export** on the right.

3. Assign personnel

Select an organization on the left-side organization list, select the personnel to be assigned on the right, and then click **Assign Personnel** to assign the personnel to an organization except temporary department.

7 Visitor Management

Manage visitors by signing in/out and assigning/withdrawing access permissions.

7.1 Visitor Registration

Register visitor information and assign access permissions to visitors.

1. Click **Visitor Registration**. Complete the basic information about the visitor.

Visitor Registration

1 Complete Basic Info 2 Assign Access Permission

* Name: Total Visitors:

ID No.: Organization:

IC Card No.: Person to Visit:

Gender: Male Female Unknown Department to Visit:

Phone:

Remarks:

Photo: (It is recommended to upload no more than 6 images, Range from 10kb to 512kb and 1080*1920px. JPG only).

+ Add Photo

Reset Next Cancel

2. Click **Next**. Set valid access time and accessible doors for the visitor.

3. Click **OK**. The visitor has access to the selected doors within the valid time after registration.

Other Operations

- Sign out

Click  in the **Operation** column to sign out. The visitor's access permissions will be cleared after signing out.

- View authorization status

Click  in the **Operation** column to view the authorization status of the visitor's access permissions.

- Edit access permissions

Click  in the **Operation** column to edit the visitor's access permissions as needed.

- Delete signed-in visitors

Click  in the **Operation** column to delete the signed-in visitor. The visitor's access permissions will be cleared after deletion.

7.2 Visitor Records

Click **Visitor Records**, search visitor information within the specified time period.

Sign In Time: - Today Last 7 days Last 30 days Current month Name:

<input type="checkbox"/>	Name	Gender	ID No.	IC Card No.	Phone	Person to Visit	Department to Visit	Sign In Time	Sign Out Time	Operation
--------------------------	------	--------	--------	-------------	-------	-----------------	---------------------	--------------	---------------	-----------

- View details: Click  in the **Operation** column to view the visitor's information such as sign-in and sign-out.
- Delete visitor records: Select the records to be deleted and click  Delete , or click  in the **Operation** column.
- Export visitor records: Select the records to be exported, click  Export , and then select a path to save the records.

8 Access Control

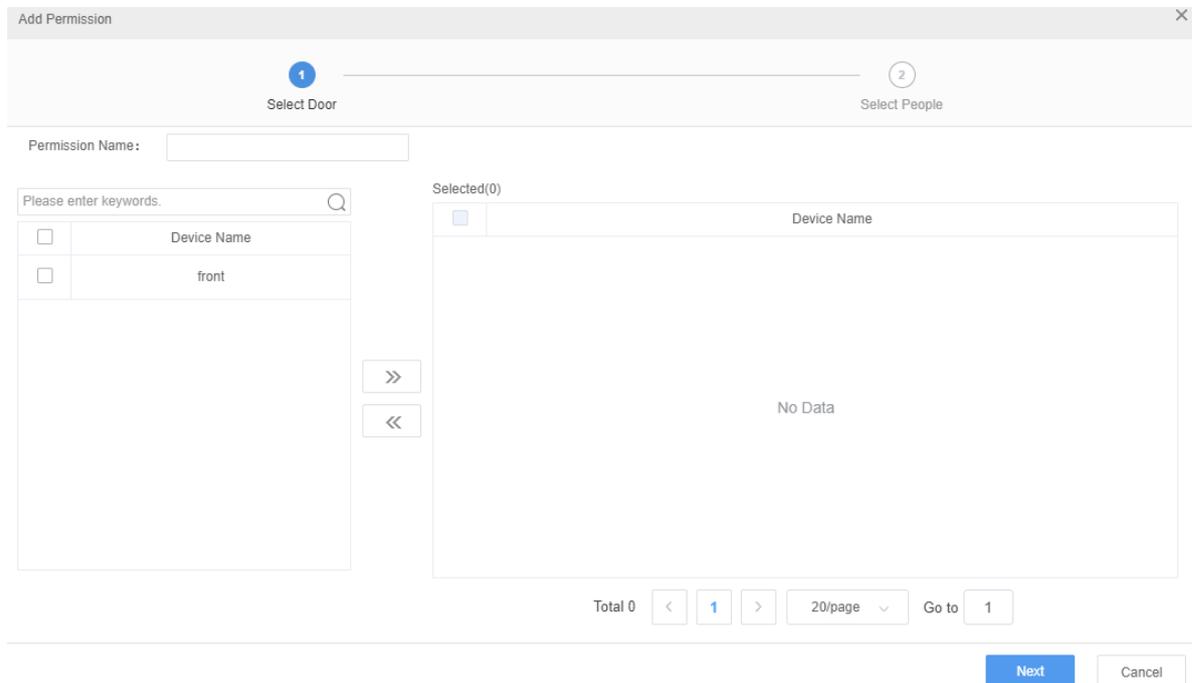

8.1 Access Permissions

Access Control > Access Permissions

Assign permissions to allow access to specified doors.

1. Click **Add Permission**.
2. Enter the permission group name, select access control devices.

- Click . The selected access control devices are added to the right-side list.
- Click **Next**.

Add Permission

1 Select Door

2 Select People

Permission Name:

Please enter keywords.

<input type="checkbox"/>	Device Name
<input checked="" type="checkbox"/>	front

>>

<<

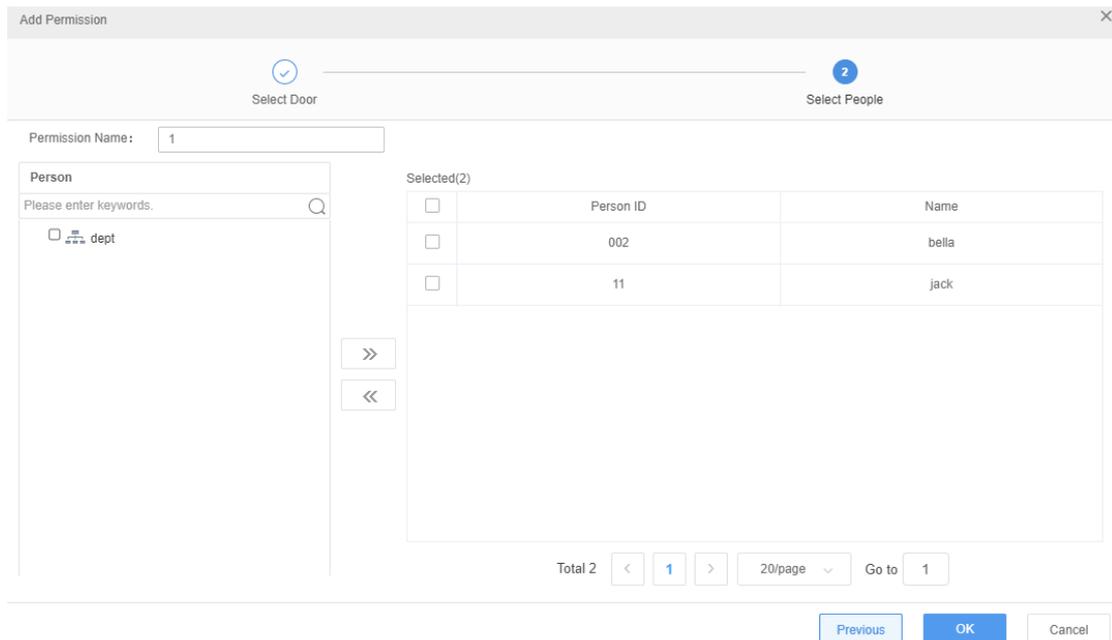

Selected(0)

<input type="checkbox"/>	Device Name
No Data	

Total 0 < 1 > 20/page Go to 1

Next Cancel

- Select the persons you want to assign access permission, click . The selected persons are added to the right-side list.
- Click **OK**. The specified persons now have access to the specified doors.

Add Permission

1 Select Door

2 Select People

Permission Name:

Total 2 < 1 > 20/page Go to 1

Previous OK Cancel

The permission group is listed. Click  to view permission assignment status.

Device Name	Name	Config Status
front	bella	Succeeded
	jack	Succeeded

A success displayed in the **Config Status** column means permission is successfully synced to the device; otherwise, failure.

On the **Access Permissions** page,  appears in the **Operation** column if permission assignment fails for any person in the permission group, in this case, you can click  to try permission assignment again for the failed person.

Click  or  to edit or delete a permission group.

8.2 Holiday Management

Access Control > Holiday Management

Set public holidays or specified days as holiday. Holiday has higher priority than attendance rules. For example, attendance rules require attendance during 9:00-17:00 from Monday to Friday. If New Year's Day is set as holiday, then holiday attendance rules are applied on New Year's Day.

Holiday Config ✕

* Holiday Name:

* Holiday Period:

Repeat By Year

1. Click **Add**, enter the holiday name and set the holiday period. The holiday name must be unique.
2. (Optional) If **Repeat By Year** is selected, the holiday will repeat every year.
3. Click **OK**.

Click  or  in the **Operation** column to edit or delete the holiday.

NOTE!

Up to 32 holidays are allowed.

9 Attendance Management

Set attendance regulations, schedule shifts, re-sign in or out for abnormal attendance records, and handle leaves. View attendance details and abnormal attendance summary.

9.1 Attendance Regulations

Attendance > Attendance Regulations > Attendance Rules

Set attendance rules.

Auto Calculation Time: Set automatic calculation time of attendance. The system will calculate the attendance data of the previous day at the set time every day. You can see attendance data in **Attendance Details**. If the automatic calculation of attendance data fails, please refer to [Attendance Details](#) for manual calculation.

Attendance Rules

* Auto Calculation Time: 12:00

Save

9.2 Staff Schedule

9.2.1 Set Time Period

Attendance > Staff Schedule > Period Settings

Set work hours and valid sign in/out time range.

Period Settings

* Period Name: 2

* Work Hours Start: 02:00 * Valid Sign In Time: 01:30 ~ 02:30 Must Sign In

* Work Hours End: 08:00 * Valid Sign Out Time: 07:30 ~ 08:30 Must Sign Out

Absence Settings

Signed In, Late Than: 0 min(s), Mark As Late

Signed Out, Leave Early Than: 0 min(s), Mark As Leave Early

Not Signed In, Mark As: Absent

Not Signed Out, Mark As: Absent

Save

1. Click .
2. Enter a name for the period.
3. Set when the work hours start and end. One day will be added automatically (+1) if the **Work Hours End** time is earlier than the **Work Hours Start** time. The **Work Hours Start** time and

Work Hours End time must be within the range of **Valid Sign In Time** and **Valid Sign Out Time**.

4. Set whether sign-in and sign-out are mandatory.
 - Sign-in and sign-out are mandatory
 - a Set Valid Sign In Time and Valid Sign Out Time: Specify a valid time range for sign-in and out. The time range includes the boundary values. For example, if the Valid Sign Out Time is 17:30-18:30, then sign-out is allowed during 17:30-18:30.
 - b Configure absence settings.
 - Signed In, Late than x min(s), Mark As Late: If a person signs in within x min(s) after the Work Hours Start time, the attendance status is normal. x is no more than 999.
 - Signed Out, Leave Early Than x min(s), Mark As Leave Early: If a person signs out within x min(s) before the Work Hours End time, the attendance status is Normal. x is no more than 999.
 - Clear the checkboxes if sign-in and sign-out are not mandatory.
5. Click **Save**.

To edit a time period, click the period name on the left.

NOTE!

- All the time set on this page cannot be later than the auto calculation time of the next day.
 - The valid sign-in time range must not overlap with the valid sign-out time range.
-

9.2.2 Shifts Management

Attendance > Staff Schedule > Shift Mgt

Add shifts and set the corresponding time period for each shift.

1. Click , enter the shift name.
2. Click **Select Period**.

3. Select a workday on which the shift starts.
4. Select a time period (set in [Period Settings](#)).
5. Select workdays for the time period. Select **All** to apply the same settings to every day (Monday through Sunday).
6. Click **OK**.

Click **Empty** to clear all the valid time periods.

NOTE!

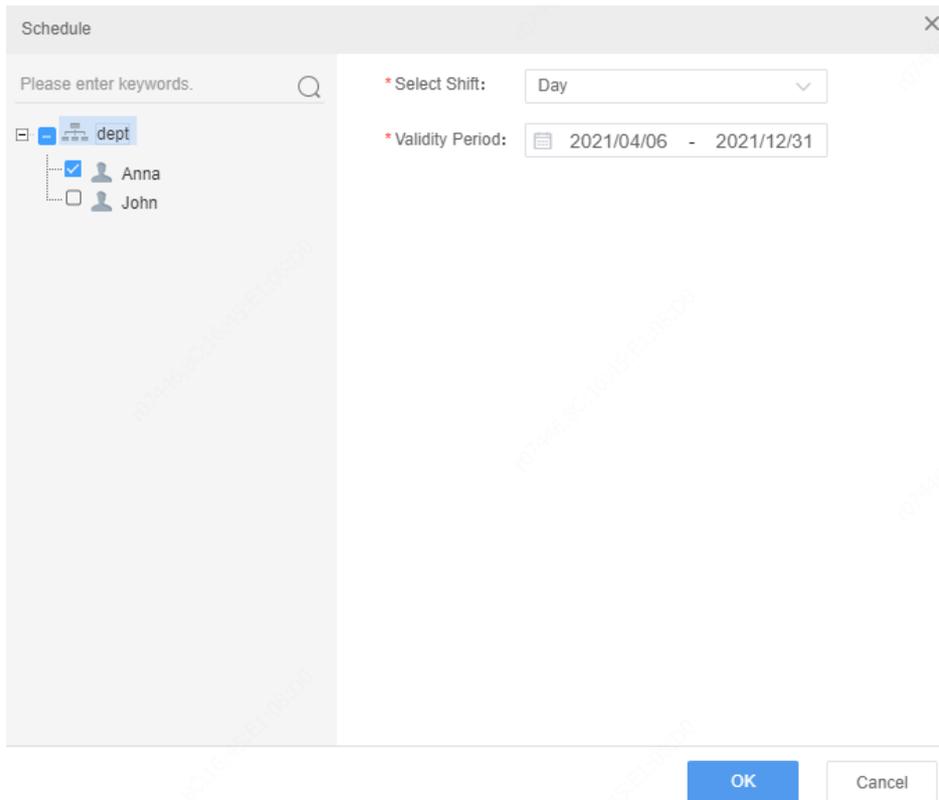

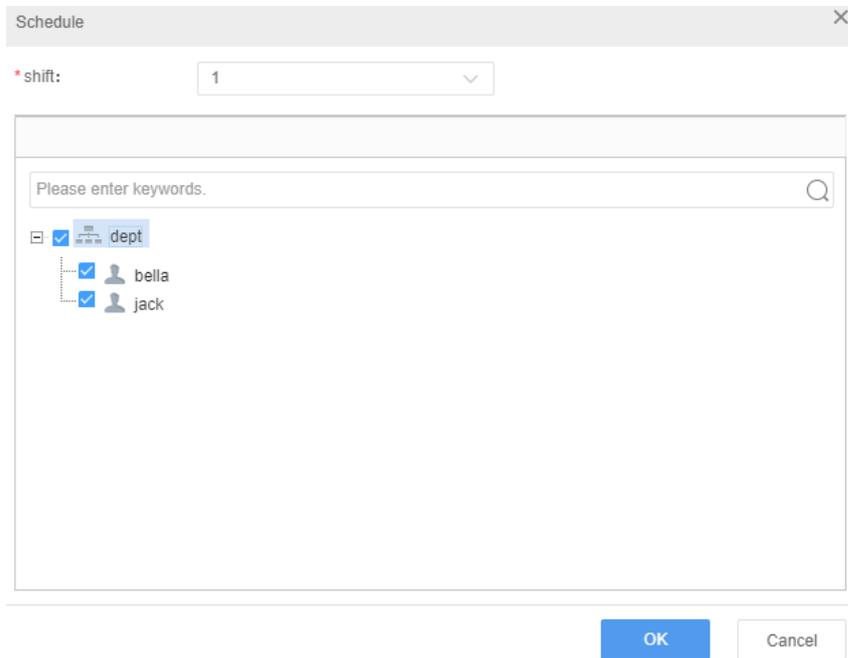

Up to 8 periods are allowed for each shift.

9.2.3 Schedule Management

Attendance > Staff Schedule > Schedule Mgt

Specify shifts for a department or a person.

1. Click **Schedule**.

2. Select the department or persons for which you want to set schedule.
3. Select a shift and set a validity period.
4. Click **OK**.

NOTE!

- You can schedule different shifts for a person by setting different validity periods for the shifts.
- Each person can have only one shift every day. If the validity period of the new shift and the old shift overlap, the overlapping part of the validity periods belong to the new shift.

To cancel a shift for a person, select the shift and then click **Cancel Schedule** on the top.

9.3 Attendance Handling

9.3.1 Leave Management

Attendance > Attendance Mgt > Leave Mgt

Please enter keywords. 2

dept

1 Anna

John

Add

* Person:

* Main Leave Type:

Sub Type:

* Leave Start Time:

* Leave End Time:

Remarks:

Note: Leave and re-sign are not automatically counted in attendance data. Please manually calculate them in Attendance Details.

OK Cancel

1. Select the target person on the organization list.
2. Click **Leave/Business**.
3. In the dialog box displayed, select the main leave type, set the leave start time and leave end time.
4. Select a sub-type. The **Sub Type** drop-down list is displayed only when the main type is **Ask for Leave**.
5. Click **OK**.

Click or in the **Operation** column to edit or delete the leave.

9.3.2 Re-Sign In&Out Management

Attendance > Attendance Mgt > Re-Sign In&Out Mgt

For abnormal attendance records such as absence, late arrival, you can modify the attendance records by re-sign in and out operations. After making a re-sign in or out, you can click **Calculate** in Attendance Details to update the attendance status and absent hours of this day.

Workday	Department	Person ID	Name	Shift Name	Work Hours	Sign In Time	Sign Out Time	Attendance Status	Absent Hours	Operation
2021/02/26	dept	002		2	02:00-08:00	(-)	(-)	Absent	6hour(s)	

1. Select the department or person on the left-side organization list.
2. Set a time range. All the abnormal attendance records of the specified department or person within this period are displayed.
3. Click (re-sign in) or (re-sign out) in the **Operation** column for the absence record you want to handle.
4. Modify the sign-in time or sign-out time as needed.
5. Click **OK**.

Effective Re-sign In&Out Time Range

Whether Have Asked for Leave	Effective Re-sign In Time Range	Effective Re-sign Out Time Range
Yes	Sign In Start Time to Sign In End Time	Sign Out Start Time to Sign Out End Time
No	Sign In Start Time to Work Hours End Time	Work Hours Start Time to Sign Out End Time

NOTE!

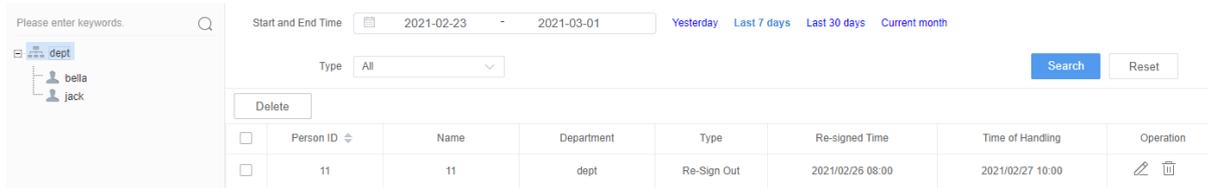

- The re-sign in or out time must be within the effective time range, and the re-sign out time must not be earlier than the re-sign in time; otherwise, the re-sign in or out operation is not effective.
- A person can be re-signed in or out up to 100 times a day. Before more re-sign operations can be performed for this person, you need to clean up re-sign in&out records for this person manually.

9.3.3 Re-Sign In&Out Records

Attendance > Attendance Mgt > Re-Sign In&Out Records

A record is generated each time a sign-in or sign-out time is modified manually. You can search, edit or delete re-sign in&out records on this page.

1. Select the department or person from the organization list.
2. Specify a time range and type, click **Search**. Search records are displayed.

Click  to modify a re-signed time.

Click  to delete a re-sign in&out record. After the record is deleted, the person's attendance statistics will use the original attendance data during the corresponding time period.

9.4 Attendance Statistics

Attendance statistics only include people in the system and do not include strangers. Entry/exit records of strangers are included in pass-thru records.

[Original Data](#): View all records of people entering or leaving by face recognition or swiping cards during the specified period.

[Attendance Details](#): View attendance details including attendance status and absence duration during the specified time period. One record is generated for each person every day.

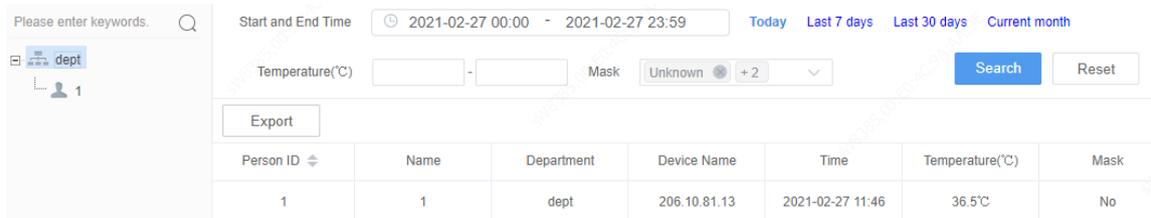

[Attendance Summary](#): View the total length of absence during a specified period and the details.

9.4.1 Original Data

Attendance > Attendance Statistics > Original Data

View all the records of people entering or leaving by face recognition or swiping cards during a time period. For example, if there are five entries or exits, then five access records are displayed.

Search original data of a department or a person using search criteria including person ID, name, department, date, time, body temperature, whether wearing a mask.

3. Select the department or person from the organization list.
4. Set a time range.
5. (Optional) Set a body temperature range and mask wearing status. This feature is available when the access control device supports this feature and the required configurations have been completed.
6. Click **Search**.
7. Search results are displayed. You can click Export to export the data.

9.4.2 Attendance Details

Attendance > Attendance Statistics > Attendance Details

View attendance details including attendance status and absence duration during a specified period. One record is generated for each person every day.

All the original data of a day will be generated at the automatic calculation time on the next day. If automatic calculation fails, or if any shifts have changed, you can select the department or person on the left-side organization list, set the start and end time, and then click **Calculate** to re-calculate attendance and generate attendance details.

NOTE!

When you calculate attendance for a certain day, if abnormal shifts are detected for this day, or if any shifts in this day are not yet started or ended, then attendance data of the relevant persons in this day will be deleted and will not be calculated.

You can search attendance statistics of a department or a person by setting search criteria including person ID, name, department, date, time, sign-in/out time.

Workday	Department	Person ID	Name	Shift Name	Work Hours	Sign In Time	Sign Out Time	Attendance Status	Absent Hours	Remarks
2021-04-05	dept	001	John	Night	14:00-22:00	2021/04/05 14:00	2021/04/05 22:00	Normal		

9.4.3 Attendance Summary

Attendance > Attendance Statistics > Attendance Summary

View the total length of absence during a specified time period and the details. For example, the total length of late arrivals, leave early, and absence during one month.

You can set search criteria to view personnel information of a specified department or personal information of a about a person, including person ID, name, department, attendance status and details.

Department	Person ID	Name	Late Hours	Leave Early Hours	Absent Hours	Ask for Leave Hours	Attendance Details
dept	002	bella	30min(s)	30min(s)	6.00hour(s)	0min(s)	

Click in the **Attendance Details** column to view detailed attendance information of the person.

Workday	Department	Person ID	Name	Shift Name	Work Hours	Sign In Time	Sign Out Time	Attendance Status	Absent Hours	Remarks
2021/04/05	dept	001	John	Night	14:00-22:00	2021/04/05 14:00	2021/04/05 22:00	Normal	0min(s)	

10 Pass-thru Records

10.1 Real-time Records

Pass-thru Records > Real-time Records

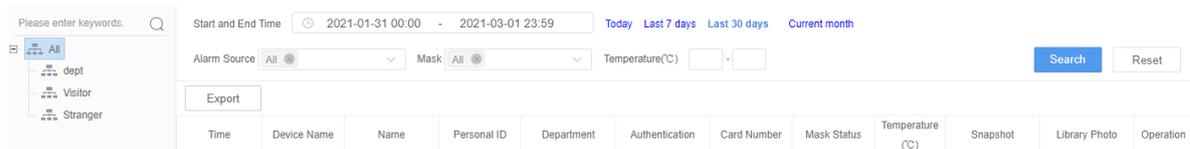

View real-time records of people passing through an access control terminal. Click  in the **Operation** column to view the detailed information.

10.2 History Records

Pass-thru Records > History Records

View historical records of people passing through an access control terminal.

Select a department you want to search in the organization list on the left. Set the alarm source, date, mask wearing status and body temperature. Click **Search**, then the search results will be displayed.

- To view detailed information about a record: click  in the **Operation** column.
- To export search results: click **Export**.

11 System Configuration

11.1 Snapshots

Set a path for saving snapshots. The PC's disk storage status is displayed. Choose a disk with sufficient space. Snapshots will be saved to the specified path.

11.2 Alarm Parameter Configuration

1. Click **System Configuration > Alarm Settings**.
2. Configure alarm parameters. Parameters are described in the table below.

Parameter	Description
Temperature Unit	Choose Celsius or Fahrenheit as temperature unit.
Temperature Detection	Enable/disable temperature detection. When temperature detection is enabled, an alarm will be reported when the temperature measured exceeds the threshold.

Parameter	Description
Abnormal Temperature Threshold	Set a threshold for abnormal temperatures. An alarm will be reported when the temperature measured exceeds the threshold.
Mask Detection	Enable/disable mask detection. When mask detection is enabled, an alarm will be reported when a person not wearing a mask is detected.
Alarm Sound	When this feature is enabled, the alarm will sound when an abnormal temperature or a person not wearing a mask is detected. Please enable temperature detection or mask detection first.
Pop-up Alarm Window	When this feature is enabled, an alarm window will pop up when an abnormal temperature or a person not wearing a mask is detected. Please enable temperature detection or mask detection first.

3. Click **Save**.

11.3 Database Management

Enable **Scheduled Backup** or click **Backup** to back up data. Backing up or restoring data may affect client performance, it is recommended to perform backup and recovery when the client is idle.

Restore
Backup

Save Backup To:

Scheduled Backup: On Off

Start Backup On: Monday Tuesday Wednesday Thursday
 Friday Saturday Sunday

Start Backup At:

Message: Previous Backup 20:07 02-23-2021
Next Backup 20:17 02-25-2021
Do not save the backup to the disk where the operating system is installed.
The backup is a copy of the data in the database.
A backup file is encrypted using the current user's password. This password is required when you use this backup file to restore data.

Save

Back up data

1. Click  to set the backup path. The backup files are saved in the EZAccess_config_DB folder. If this folder doesn't exist, it will be created automatically.
2. Back up data:
 - Scheduled backup: Perform scheduled backup according to user's configuration. This function is turned on by default, you can turn it off manually.

- a) Enable **Scheduled Backup**.
 - b) Set backup date and time. The backup will run automatically on the set date and time on a weekly basis.
- Manual backup: Click **Backup** to back up immediately.

Only the latest backup file is kept in the backup path.

Restore data

1. Click **Restore**.
2. Enter the file password to decrypt the backup file. Click **OK** to restore the latest backup data.

11.4 System Maintenance

Data migration can be used to quickly configure the client and restore data in some scenarios such as computer replacement and data sharing. Compared with backup and recovery, data migration can also restore face images and images for pass-through records.

Data Migration

Import

Export

Note: Import or export the database and images only.

Export data

1. Click **Export**.
2. Choose a path to save the exported data. The exported files are saved in the EZAccess_config_migration folder. If this folder doesn't exist, it will be created automatically.
3. Click **OK**.

The exported file is named Access_config_migration + *export time* (the export time includes year, month, day, hour, minute and second).

Import data

1. Click **Import**.
2. Choose a file and then enter the file password (the file password is the same as the client login password of the exported user).
3. Click **OK**.
