

How to Set Up Motion Recording on Unicorn?

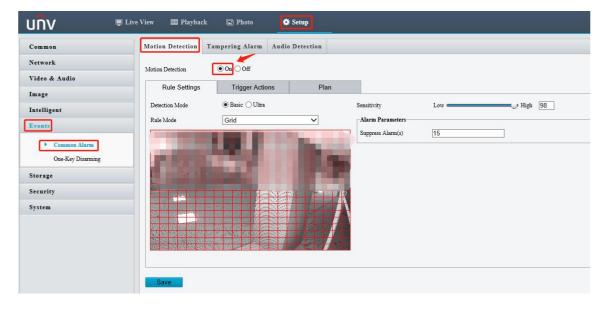

How to Set Up Motion Recording on Unicorn?

Description

Note: This method is applicable to most of the scenarios encountered problems, if the method still cannot solve your problem, it is recommended to consult our Tech Support Team. https://global.uniview.com/Support/Service_Hotline/

Operating Steps

Step 1 Enable motion detection on the camera's web interface and then set up the detection rules, trigger actions, and plan (arming schedule).

Step 2.1 Create an alarm task on the Unicorn's web interface under **Alarm Configuration**.

Step 2.3 Trigger action should be **Recording** and the other three options can be selected at the same time or separately.

Note: You may tick *Link with Alarm Source Itself* if you want each camera to trigger themselves for recording when motion is triggered.

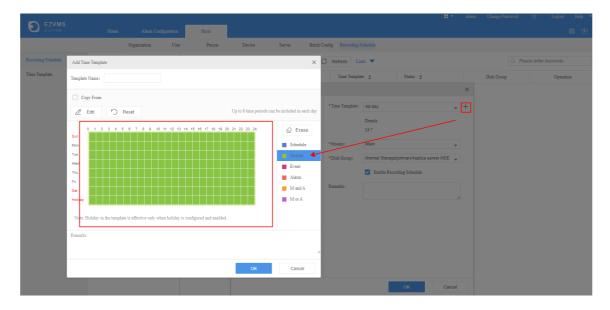

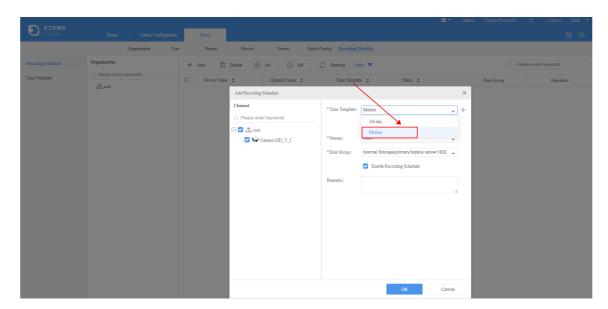

Step 3.1 Create a recording schedule for motion detection and select camera.
